PROFESSIONAL SUMMARY

Full Stack Developer with experience working across the entire product development lifecycle, from planning to deployment in production. Graduated in Analysis and Systems Development and postgraduate in Software Engineering.

Proficient in developing scalable and efficient solutions with PHP, using Laravel, Codeigniter, and Slim frameworks, and frontend with Vue.js and React, with familiarity with Node.js and Express.

Knowledgeable in architecture and design techniques such as MVC, Hexagonal, Microservices, Design Patterns, principles, and best practices with PSR's, SOLID, DRY, TDD, and Clean Code.

Familiarity with relational databases like MySQL, Postgre, Oracle, and non-relational (NoSQL) databases like MongoDB and Redis, version control with Git, Github, Gitlab, and BitBucket, cloud computing with AWS and Digital Ocean, and DevOps with Docker, Github Actions, and Kubernetes.

EDUCATION

Post Graduate - Software Engineering

Anhanguera Educacional University   **05/2023 a 04/2024**

Technologist Degree in Systems Analysis and Development

Universidade Paulista UNIP University   **04/2016 a 06/2019**

PROFESSIONAL EXPERIENCE

Full-stack PHP Developer

Taking - Remote   **01/2024 - 06/2024**

Allocated as a Full Stack PHP Developer at Solística, the leading company in logistics solutions for the entire Latin America region. Engaged in a large-scale project following the agile Scrum methodology, developing full stack web solutions with PHP (Laravel) on the backend and Vue.js on the frontend. Actively collaborated to optimize logistical processes, integrate APIs, and create new modules. My goal is to ensure excellence in development, contributing to the success of Solística's clients throughout the Latin American region.

Full-stack Developer

Daxgo Commerce - São Paulo, SP - Remote   **06/2022 a 08/2023**

Development of a SaaS platform for monitoring and optimizing digital businesses and e-commerce using the PHP Laravel framework on the backend, combining Inertia with Vue.js on the frontend to ensure modern and efficient interfaces. Additionally, creating mobile solutions with React Native to provide highly functional and responsive mobile experiences, enabling clients to track results and performance on the go.

Full-stack Developer

Softbet - Remote   **08/2021 a 10/2022**

Development and maintenance of web and mobile applications for creating and managing the SaaS platform in the sports betting segment using the Laravel framework on the backend, Vue.js on the frontend, and React Native for the sales application and ticket printing on Android POS machines. Combining robust technology with the specific needs of this segment, resulting in interactive and engaging solutions for betting shops.

Systems Analyst Developer

Marcasite Agência Digital - Santos, SP - Remote   08/2020 a 01/2022

Requirements analysis, planning, and development of websites and custom applications, covering PHP and Laravel for backend development, Vue.js and React for frontend development, and React Native for mobile apps. Additionally, I performed occasional maintenance on WordPress websites and systems developed with Node.js.

IT Business Manager

Mentora Soluções (Franquia Gigatron) - Jundiaí, SP   04/2019 a 07/2020

Implementation, training, and support of the proprietary ERP system, where I played a vital role in ensuring the system's effectiveness for clients. Additionally, I participated in the conceptualization, analysis, and development of new products, as well as managed the Jundiaí - SP unit from March 2019 to August 2020, actively contributing to business expansion.

Systems Analyst

Gigatron - Birigui, SP   06/2013 a 03/2019

Implementation, training, and support for the company's ERP system, maintenance of SQL databases, and development of customized reports and dashboards using advanced SQL queries. With the emergence of demand for online management systems, I participated in the conceptualization, analysis, and development of new web-based products, such as dashboard and reporting platforms with integration via Restful APIs and integration with e-commerce platforms.

Web Developer

Agência StandUp - Birigui, SP   01/2013 a 06/2013

Development and maintenance of websites and online stores using the Magento platform, as well as customization of templates with PHP, HTML, CSS, and Javascript.
